

Sheffield® Fusion-Welded Vinyl Windows

Ultra-Premium, Custom-Made Windows from Alside Windows

The superior performance of Sheffield® Windows starts with innovation and adds up to greater energy savings and lower utility bills. Every precision-engineered component contributes to superior energy savings. The multi-chamber design helps trap dead air to produce an effective barrier, while the extra-thick, fusion-welded frame and sashes provide superior structural strength and create a permanent barrier against air and moisture infiltration.

Sheffield Windows feature a sloped sill which prevents air and water infiltration while maintaining a timeless, detailed appearance. Beveled mainframe on double-hung and sliding windows complement any home's style.

Best yet, Sheffield Windows are covered by Alside's impressive Lifetime Limited Warranty for complete peace of mind.

Features and benefits:

- A multi-chamber design helps trap dead air to produce an effective insulating barrier
- Fusion-welded frame and sashes provide superior structural strength and create a permanent barrier against air and moisture infiltration
- A constant force balance system and heavy-duty operating hardware continue to operate perfectly and ensure easy operation, even after decades of regular use
- Heavy-duty SteelForce™ reinforcement is placed within the sashes at the meeting rails to ensure extra protection at this very critical and often used location
- The Intercept Spacer System helps reduce conducted heat loss through the window and is better at retaining insulating gas than many conventional designs
- Triple-barrier weatherstripping between the sash and jamb for superior protection from air and water infiltration
- Sloped sill to prevent water and air infiltration, forcing water to drain to the exterior of the window

Ask Pro-Homes about the optional ClimaTech insulated glass packages available for optimal performance in your home's climate zone.
